Room 204 Hair Makeovers

March / April / May 2019

Ethan

Overt Message (Describe your hair)

My hair is short. My hair is red. My hair is spiky. My hair is dyed

Implied Message (What ideas might come

The hair makes me look cool, weird and a bit silly. It makes me look cool because most people don't have red hair and a lot of people's favourite colour is red. It might seem weird and silly because red is an unusual colour for hair. The hair makes look like a clown because clowns have bright and mostly red hair.

Stereotypes (Reinforce/support or defy/break?)

The stereotype is that people with red hair have bad temper and get mad easy. I break the stereotype because I do not get mad easily. Another stereotype is if you have short hair, you are a boy. That stereotype is reinforced because my hair is red and I am a boy. Another stereotype is that people with red hair are always silly and never silly

Preferences (Who might like and why?)

The people who would probably like my hair would probably be people who like colourful or bright things because my hair is bright. Someone who would probably like would be Tyler because he likes to do stuff with is hair. Also, Jeffery might like my hair because he might think it is silly and will think that it is funny. If someone's favourite colour is red, they might like the hair and they might think it's cool.

Toby

Overt Message (Describe your hair)

(Note: I DO NOT LIKE BTS.) It is a little bit long, and brown.

Implied Message (What ideas might come)

My hair looks weird and my hair is brown.

Stereotypes (Reinforce/support or defy/break?)

People say that if you have this type of hair you must like BTS.

Preferences (Who might like and why?)

No one will like it! Because they think I like BTS.

Kelly

Overt Message (your hair Describir)

It's a nice shade of light brown and very out there. Not many people have this shade of brown, so it's quite weird to see. Another desc it's in a ponytail which is usual, but some people says that brunettes like to style their hair in a outgoing way. Last desc is that it's kinda messy, but many stereotypes claim that brunettes are very neat and proper.

Implied Message (What ideas might come)

Ideas that might come could be "She's a good choice for a friend" because many stereotypes are brunettes are faithful and positive.

Another Idea is I'm sophisticated (worldly experience and knowledge) because often brunette's are "smart"

Stereotypes (Reinforce/support or defy/break?)

Stereotypes(Support):"She's so positive" because just by looking at a brunette you would think they're sweet and kind, always thinking about the good side of life.

(Break):"She's super snobby!" because many people think brunette are "rich" and many think "rich" people are snobs.

Preferences (Who might like and why?)

Maybe a lover/suitor, because dark hair have a stereotypes that they're "plain". While maybe other students, eg: if I moved school with this hair, many people would think am kind as stereotypes put it as.

Michelle

Overt Message (Describe your hair)

Implied Message (What ideas might come)

Stereotypes (Reinforce/support or defy/break?)

Preferences (Who might like and why?)

Christine

Overt Message (Describe your hair)

It is brown and wavy.

Implied Message (What ideas might coming)

This hair is the best because it is long

Stereotypes (Reinforce/support or defy/break?)

 They might be Sassy and outgoing

Preferences (Who might like and why?)

Models and sassy/pretty people

Jasmine

The overt message is that it's in a bun, it's short, it's smooth, and it's brown. A lot of everyday people wear it to make their less messy.

Some implied messages are that it's just to keep my hair neat, and I like it short. Even though I don't like my hair short.

A stereotype for short hair is that some people might think you HATE your haircut and that you regret it.(I do)

I believe that a lot of girls will like it because it's neat and pretty. They might like it neat because sometimes when you do it in a ponytail hair strands can get loose. Also they might like it pretty because most girls want/like to look nice/good.

Rose

Overt Message (Describe your hair)

My hair is light brown and blonde. It is also curly and wavy like beach waves. It is no so long and not so short. At the top it is more blonde and on the bottom it is darker. It is also very messy.

Implied Message (What ideas might come)

My hair makes me look cool and like a model. It is messy and not neat which might make people think that I am lazy. It looks cool because it the colour changes.

Stereotypes (Reinforce/support or defy/break?)

Some stereotypes of blonde haired people are you are ditzy and not smart. I don't think that it supports that stereotype. A stereotype of blonde people is that they are attractive. I don't think I fit with that. Messy hair will make people think I am lazy but I'm not. A stereotype for brunettes(brown haired people) is that we are serious which means I am is reinforcing it.

Preferences (Who might like and why?)

Some people that might like it are little kids, superstars and models. Little kids might like it because it would make them look fancy. Superstars or models might like it because it would help them fit in with most other models and superstars because most models and superstars are blonde.

Audience Response

I like Rose's hair because it is different to her usual style of hair. Usually her hair is up.(Yanny)

Rose's hair looks nice but it is weird because it is short and wavy. (Michelle)
Tyler

Overt Message: This was my hair before my current haircut. At the time the only difference was the colour. I want people to notice and Recognize just how similar this hair type is to the other boys.

Implied Message: I think if all hair was the same it would be boring. In my opinion this hair is ordinary and expected I love when people try new things with their hair and do what they like with it no matter what anybody says or thinks be bold be outrageous and if you feel like it make everyday creative hair day.

Preferences: People who follow the stereotypes that boys should have short hair and do what is "Attractive and Trendy". My issue with this is that trendy literally means what everybody wants and has wich is what I strive not to be. I want to be a role model and have people see and respect all opinions and to try new things with their hair.

Jun yi

Overt Message (Describe your hair)

My hair colour is light brown and straight, this is my natural hairstyle. It is very smooth and it's long. My hair is very neat and clean, the type of hair I have is thick and soft.

Implied Message (What ideas might come)

The idea of my hairstyle come from itself. I think it looks more natural and cool, I changed it to light brown because this colour was used by many people. This hair is style makes me look original because this is my original hairstyle but in different colour.

Stereotypes (Reinforce/support or defy/break?)

My hair is neat and straight which means that I wash it often. People might think that I'm not smart because my hair is kind of blondish. But i think it looks normal to me.

Preferences (who might like it and why?)

I think many people would like it because it looks natural and it very smooth. I also think that some famous actor would like it because it looks cute and neat.

Yarlini

Overt Message (Describe your hair)

My hair is light brown. My hair is also neat and is ties in a braid it looks like a dutch braid. Some strands are also out of my braid.

Implied Message (What ideas might come) and Stereotypes (Reinforce/support or defy/break?)

My hair makes me look like a very organized students. I look like a very organized student because the stereotypes for brown is that they're serious and smart.

Preferences (Who might like and why?)

The people who might this hair might be people be people who like to dye their hair in different colours. People who are going to dye their hair for first time might also like it because it shows them that they fit in and they aren't the only who dyed their hair

Leo

Overt Message (Describe your hair)

Implied Message (What ideas might come)

Stereotypes (Reinforce/support or defy/break?)

Preferences (Who might like and why?)

I change my hair color to long white hair. It might think I am old or a girl. I would like it or other people without pigment in the hair.
Alex (Caliboo)

It's a nice blue shiny blue.

Implied Message (What ideas might come)

Stereotypes (Reinforce/support or defy/break?)

Preferences (Who might like and why?)

My hair is a nice shiny blue. This hair makes me look like Ninja. The stereotype

Michelle

Overt Message (Describe your hair)

My hairstyle is in a brown bun, it show that it is long because you could put it high, plus the hair also looks thicker, meaning that it's longer.

Implied Message (What ideas might come)

My hairstyle comes from the idea of many model/fashion designers. Keeping your hair up, means that you are quite mature.

Stereotypes (Reinforce/support or defy/break?)

I think this style breaks the stereotype of strict librarians, or old people. It breaks the stereotype by showing that I'm a young student.

Preferences (Who might like and why?)

I think many models would like this hairstyle because it looks very mature and sophisticated.

Nathan

Overt Message (Describe your hair)

It is a little mixture brownish redish. Looks pretty original though.

Implied Message (What ideas might come)

Cool or weird???IDK Very natural.

Stereotypes (Reinforce/support or defy/break?)

Weird, uh? Normal? Nice? Natural.

Preferences (Who might like and why?)

I think anyone might like it. Maybe they like the colour? Or maybe they like the spike?

Yanny

I changed my hair colour to a dark brown. As I see it, my hair seems more smooth.

People with brown hair look good in my opinion. It also makes me look like i'm older than my actual age.

A Stereotype for dark brown hair is the person probably dyed their hair brown and it's not natural.

I like Yanny's new hair because it looks so much like her original hair.(Jasmine)

I think Jasmine liked it because she likes how my oringinal hair was long and after I changed it it's still long.

Jacky

Overt Message: My hair is blue and it's pointing downwards like spikes. My hair is really blue on the top because that is where i have the most hair.The corners have really short hair and small.

Implied Message People might think that I look weird because you don't usually see someone having blue hair. This color looks cool to some people because they like colorful hair colors.

Stereotypes My hairs supports the Stereotype cool.My hair color is bright and colorful. My hair supports the stereotype funny. I look like I am going to a try out to the circus and work for the show.Some stereotype that my hair shows is sad. Blue is a color that shows calm and relaxing like how water moves. A stereotype for blue

Hailey

Overt Message (Describe your hair)

The colour of my hair is a bit of dark purple. It is short with bangs on top of it. Both of the sides are long with purple and the top it looks kind of black because of the light. The back is short with dark purple at the back of my hair.

Implied Message (What ideas might come)

She looks mean and not very friendly. Some people would look at you in a very mean way or a scared way. Like she would not be a good friend because she looks like she would be mean to people.

Stereotypes (Reinforce/support or defy/break?)

People would say that "She looks like a devil". Like devils would have purple or black hair sometimes to show that they are bad. Some people would say "she looks super cool I wish I had my hair colour like her's". Because some people think people with purple hair can be cool and want to be like them.

Preferences (Who might like and why?)

Maybe a rockstar would like it. A rockstar might like it because it like a dark colour and rockstars like to be cool. They might also like people that look cool and has their hair short or looking cool.

Jeffery

Overt Message (Describe your hair)

Longer, straight up and brown.

Implied Message (What ideas might come)

People might think I don't like to have haircuts.

Stereotypes (Reinforce/support or defy/break?)

People might think I dyed the hair

Preferences (Who might like and why?)

The colour or the longness.

OLIVIA

Overt Message (Describe your hair)

My hair is purple, and I have bangs. My hair looks short but it's tied but into a ponny tail. You can't see it because it's behind my head

Implied Message (What ideas might come)

When looking at my hair you may first not like it. Because it looks short and it's purple. I know people don't hate the colour purple but they wouldn't want to die it purple. But I think purple is a nice colour.

Stereotypes (Reinforce/support or defy/break?)

People may think of me as someone who likes to play around a lot. Because most people who pick to die their hair fully 1 colour are seen to like to play around. But it's not true because you can't judge a book by its cover.

Preferences (Who might like and why?)

Someone that might like my hair is someone that likes having fun. Because like I said people that die their hair maybe someone that likes to have fun. Another person that may like my hair is someone that is creative, because creative people think outside of the box.
Nate

Overt Message: My hair is blue and it has my regular hair style I did not change the style.

Implied Message: The ideas that came to my head are my hair is blue and that it might not be a good style.

Stereotypes: People say that blue hair is not cool. People with blue hair get made fun of because they choose the colour.

Preferences: The people who would like my hair colour are youtubers and people who like cool colours.

ChenXi

Overt Message (Describe your hair)

Implied Message (What ideas might come)

Stereotypes (Reinforce/support or defy/break?)

Preferences (Who might like and why?)

Kenny

Overt Message (Describe your hair)

Implied Message (What ideas might come)

Stereotypes (Reinforce/support or defy/break?)

Preferences (Who might like and why?)

Eason

Overt Message (Describe your hair)

Implied Message (What ideas might come)

Stereotypes (Reinforce/support or defy/break?)

Preferences (Who might like and why?)

Jackson

Overt Message (Describe your hair) My hair is long, blue, curved to the right in the front, spiky on the back of my hair, it is soft, and messy.

Implied Message (What ideas might come) The ideas that might come for people is that I'm sad or extreme because I don't have hair similar to other people just because I changed the color.

Stereotypes (Reinforce/support or defy/break?) My hairs stereotype breaks it because the stereotype for people with blue hair is that they are always sad and gloomy but I'm not a sad and gloomy person so I think that it breaks the stereotype.

Preferences (Who might like and why?) The people that would like my hair are probably the creative and artistic people because I feel like artistic and creative people tend to like a change in anything like hair for an example, and since my hair is blue I think artistic and creative people will like it.
Kevin C

Overt Message (Describe your hair)

Implied Message (What ideas might come)

Stereotypes (Reinforce/support or defy/break?)

Preferences (Who might like and why?)

Sruthy

Overt Message (Describe your hair)

I would describe my hair as light brown. It is tied in a ponytail which makes the hair not go everywhere. It is also neat so that it is not messy.

Implied Message (What ideas might come) Stereotypes (Reinforce/support or defy/break?)

My hair makes me look like a big girl. What I mean about being a big girl is that people say that people with dyed hair especially brown hair are only for adults. People with highlights are some stereotypes.

Preferences (Who might like and why?)

People who might like this are people who likes style. If someone were to look at me, they would wowed because not many people dye their hair OR do hairstyles with their hair. If I look at a person with a dyed hair OR a brown hair, I would be amazed how pretty that person looks. I think Yarlini would like this hair because it what she would like to do in the future. In her photo, it shows her as having brown hair LIKE ME!!!

Anson

Overt Message (Describe your hair)

My hair is messy, as it is also black like my natural hair colour. There here is a lot of it. My hair goes to the left and it is very odd looking, as it is not really common for someone to have the style of hair I have. I also have hair that covers my forehead.

Implied Message (What ideas might come)

People can make many assumptions. My hair makes me look weird and it is long, messy, and there is too much, and some people might start recommending me to go to a barbershop soon

Stereotypes (Reinforce/support or defy/break?)

Most stereotypes defy my hair colour. Stereotypes such as maturity, seriousness. I would have to have less hair if I wanted to be more serious in any kind of situation, whether or not it was a job interview or anywhere. I show no maturity because I am not taking in the fact that my hair is too long, and I ignore other opinions. Some stereotypes that support my hair is calm, I show I am not

Jiayi

Overt Message (Describe your hair) My hair is long, brown, smooth and soft looking and curly. My hair goes down to my shoulders making it look longer. My hair also is curl which some people can think it looks sassy or pretty. When looking at my hair it's not messy or frizzy, it looks soft when touched, shiny, and clean as well. My hair is not up in a ponytail so it's kind of weird because it doesn't look like me. My hairstyle looks healthy because it's shiny and clean looking like.

Implied Message (What ideas might come) Some ideas when looking at my hair people might think it's pretty or girly since it's down. When seeing this hairstyle you can think of going to some kind of ball, party, or wedding to celebrate in this long and curled hairstyle. Some people can also think this style goes well with makeup to look sassy or beautiful. My hair makeover could also look like some type of model or celebrity because often lots of models and celebrity like this type of hairstyle because it looks good, clean, pretty, shiny and not messy or frizzy.

Stereotypes (Reinforce/support or defy/break?) I think when people look at my hair they will probably think it's pretty and clean since it's not something I would usually wear. I think when people look at me they will think of me of having a model's or celebrities or famous persons hair because often lots of famous people (specifical females) likes these type of hairstyle because it looks great and feels great. People might think I like or look like others because we might possibly have the same hairstyle but that doesn't mean we're connected in anyway way. I think with this hairstyle I look like a "jerk" because I'm not used to having my hair down or curled in any way and I also don't think it matches me in anyway way at all because of my hair up in a ponytail every single day.

Preferences (Who might like and why?) The people that might like my hair would most likely and probably girls/ females because it's a hairstyle that girls often wear. I think girls would like it because it's brown and most girls like brown hair, it's also long, shiny, soft looking, curled and not messy, oily, dry, or frizzy. I think people that like their hair down for example models, celebrities, artists, singers, sometimes dancers would like it people of their work. I also think peopleof-of of-of of-of my hair up in a ponytail every single day.because it's easy to do the hairstyle and it looked nice and also they don't have to move as much to ruin the hairstyle so that's why I think they might like it.
